

Helpful Tips: Hull Identification Number

As part of your commissioning process, your salesperson will refer to your boat by the “Hull Number” or “HIN”. You should refer to this number when corresponding with Beneteau USA or your dealer regarding your boat.

Below is a helpful tip on what the (HIN) Hull Identification number consists of and where to find it on your boat.

HULL IDENTIFICATION NUMBER (HIN)

This number is federally required and is located on or near the boat transom’s upper starboard (right) side. Also, one is hidden by the manufacturer on the vessel for recovery purposes. HINs are 12 characters in length. They may be 17 characters on newer boats.
